

LAB MANUAL

**CSA1522-CLOUD COMPUTING AND BIG DATA
ANALYTICS**

Student name: BALA

Register number: 192524427

EXPERIMENT 1:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR FLIGHT BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To Create a simple cloud software application for Flight Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP1:

Log into [zoho.com](https://www.zoho.com)

STEP 2: Create new application from scratch

The image shows the "Create from scratch" form in Zoho Creator. At the top, there are four icons: a blue circle, a white square, a white circle, and a white square with a plus sign. Below the icons is the text "Create from scratch". The form has a light gray background. It contains a label "Application Name" with a red asterisk, followed by a text input field containing "Flight Reservation System". Below the input field is a checkbox labeled "Enable Environment" with a link "Learn More" in blue. At the bottom of the form is a large blue button labeled "Create Application".

STEP 12: Create and display the Dashboard with important information and charts from the collected data.

EXPERIMENT 2:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS IN CHENNAI CITY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Property Buying and Rental Process in Chennai City using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into **zoho.com**.

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the "Create from scratch" form in Zoho Creator. At the top, there is a logo consisting of four colored squares (blue, green, yellow, red) arranged in a 2x2 grid. Below the logo is the text "Create from scratch". The form has a light blue background. It contains a label "Application Name" with a red asterisk, followed by a text input field containing "Chennai Property Hub". Below the input field is a checkbox labeled "Enable Environment" with a link "Learn More" in blue. At the bottom of the form is a large blue button with the text "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Property Form.

STEP 5: Create Customers Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Customers' form. The top bar includes a search icon, a dropdown menu, a plus icon, and a 'Done' button. The main area is divided into three sections: 'Basic Fields', 'Field Properties', and a central list of fields.

Basic Fields: A grid of icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right showing the configuration for the selected field, 'Customer ID'. It includes fields for 'Field name' (Customer ID), 'Field link name' (customer_id), 'Validation' (Start index: 1), and 'Appearance' (Field type: Auto Number).

Central Fields List: A list of fields to be added to the form, including Customer ID, Customer Name, Gender, Mobile Number, Email, Address, Preferred Property Type, and Status.

STEP 6: Create Property Search Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Property Searches' form. The top bar includes a search icon, a dropdown menu, a plus icon, and a 'Done' button. The main area is divided into three sections: 'Basic Fields', 'Field Properties', and a central list of fields.

Basic Fields: A grid of icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right showing the configuration for the selected field, 'Buy or Rent'. It includes fields for 'Field name' (Buy or Rent), 'Field link name' (buy_or_rent), and 'Choices' (Buy, Rent).

Central Fields List: A list of fields to be added to the form, including Buy or Rent, Property Category, Preferred Location, Budget Range, Bedrooms, Furnishing, and Customer.

STEP 7: Create Rental Agreement Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Rental Agreements' form. The top bar includes a search icon, a dropdown menu, a plus icon, and a 'Done' button. The main area is divided into three sections: 'Basic Fields', 'Field Properties', and a central list of fields.

Basic Fields: A grid of icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right showing the configuration for the selected field, 'Customer'. It includes fields for 'Field name' (Customer), 'Field link name' (customer), and 'Display type' (Multi Select).

Central Fields List: A list of fields to be added to the form, including Customer, Property, Agreement Start Date, Agreement End Date, Monthly Rent, Security Deposit, and Agreement Status.

STEP 8: Create Property Bookings forms.

The screenshot shows the 'Property Bookings' form builder in the Chennai Property Hub. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a central form preview.

Basic Fields: A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right for configuring the selected 'Customer' field. It includes fields for 'Field name' (Customer), 'Field link name' (customer), and 'Display type' (Multi Select). It also shows a 'Display Fields' section with a breadcrumb 'Chennai Property Hub → Customers' and a 'Customer ID' dropdown.

Form Preview: The central area shows the form structure with fields: 'Customer' (searchable), 'Property' (searchable), 'Buy or Rent' (radio button), 'Booking Date' (calendar), 'Advance Amount' (currency), 'Total Property Value' (currency), and 'Booking Status' (checkbox).

The bottom status bar indicates a trial period of 14 days and provides links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 9: Create Feedback Form

The screenshot shows the 'Feedbacks' form builder in the Chennai Property Hub. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a central form preview.

Basic Fields: A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right for configuring the selected 'Customer' field. It includes fields for 'Field name' (Customer), 'Field link name' (customer), and 'Display type' (Multi Select). It also shows a 'Display Fields' section with a breadcrumb 'Chennai Property Hub → Customers' and a 'Customer ID' dropdown.

Form Preview: The central area shows the form structure with fields: 'Customer' (searchable), 'Property' (searchable), 'Rating' (star icon), and 'Comments' (text area).

The bottom status bar indicates a trial period of 14 days and provides links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 10: Add sample data to all the created forms.

The screenshot shows the 'Property Bookings' form in the Chennai Property Hub application. The form includes the following fields:

- Customer:** A text input field with a dropdown arrow, showing '1'.
- Property:** A text input field with a dropdown arrow, showing '4'.
- Buy or Rent:** Radio buttons for 'Buy', 'Rent' (selected), and 'Other'.
- Booking Date:** A date input field showing '28-Jul-2026'.
- Advance Amount:** A text input field showing '20000'.
- Total Property Value:** A text input field showing '100000'.
- Booking Status:** A dropdown menu showing 'Confirmed'.

At the bottom of the form are two buttons: 'Submit' (in red) and 'Reset' (in white).

STEP 11: Create reports to display the data entered in the respective forms.

The screenshot shows the 'Property Bookings Report' table in the Chennai Property Hub application. The table has the following columns: Customer, Property, Buy or Rent, Booking Date, Advance Amount, Total Property Value, and Booking Status. The data is as follows:

Customer	Property	Buy or Rent	Booking Date	Advance Amount	Total Property Value	Booking Status
1	4	Rent	28-Jul-2026	\$ 20,000.00	\$ 100,000.00	Confirmed
2	1	Buy	01-Aug-2026	\$ 125,000.00	\$ 1,750,000.00	Cancelled
3	2					
4	3					
5	4					
1	1	Buy	30-Jul-2026	\$ 25,000.00	\$ 800,000.00	Cancelled
2	2					
3	4					
4						
1	1	Buy	29-Jul-2026	\$ 100,000.00	\$ 2,000,000.00	Confirmed
2	2					
3	3					
4	4					
2	1	Rent	28-Jul-2026	\$ 75,000.00	\$ 1,500,000.00	Pending
	2					
	3					
	4					
2	1	Rent	27-Jul-2026	\$ 50,000.00	\$ 1,200,000.00	Confirmed
	2					
	3					

STEP 12: Create and display the Dashboard with important property details, buying and rental information, and charts from the collected data.

EXPERIMENT 3:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into [zoho.com](https://www.zoho.com).

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the "Create from scratch" form in Zoho Creator. At the top, there are two radio buttons: one selected (blue) and one unselected (white). Below the radio buttons is the text "Create from scratch". The form has a section for "Application Name" with a red asterisk indicating it is required. The text "CAR BOOKING RESERVATION SYSTEM" is entered in the input field. Below the input field is a checkbox labeled "Enable Environment" with a link "Learn More". At the bottom of the form is a blue button labeled "Create Application".

EXPERIMENT 4:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR LIBRARY BOOK RESERVATION SYSTEM FOR SIMATS LIBRARY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Library Book Reservation System for SIMATS Library using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into zoho.com.

STEP 2: Create a new application from scratch in Zoho Creator.

A screenshot of the "Create from scratch" form in Zoho Creator. The form has a title "Create from scratch" with a plus icon. Below the title is a field for "Application Name" with a red asterisk, containing the text "SIMATS Library Book Reservation". There is a checkbox labeled "Enable Environment" with a link "Learn More". At the bottom is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Book Details Form.

STEP 5: Create Student Details Form.

The screenshot shows the 'Student Details' form creation interface. On the left, a 'Basic Fields' panel contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main form area lists fields: Student ID (with a dropdown arrow), Student Name, Registration Number, Department, Year Of Study, Mobile Number, Email, and Status. On the right, the 'Field Properties' panel shows: Field name: Student ID, Field link name: student_id, Validation: Start index: 1, Appearance: Field type: Auto Number. The bottom status bar indicates a 14-day trial, upgrade options, and help links.

STEP 6: Create Book Reservation Form.

The screenshot shows the 'Book Reservation' form creation interface. The 'Basic Fields' panel is the same as in Step 5. The main form area lists fields: Student (with a search icon), Book, Reservation Date, Expected Issue Date, Reservation Status, and Rack Number. On the right, the 'Field Properties' panel shows: Field name: Student, Field link name: student, Display Fields: SIMATS Library Book Reservation System -> Student Details, and Display type: Multi Select. The bottom status bar is consistent with the previous steps.

STEP 7: Create Book Issue Return Form.

The screenshot shows the 'Book Issue Return' form creation interface. The 'Basic Fields' panel is the same as in Step 5. The main form area lists fields: Student (with a search icon), Book, Issue Date, Due Date, Return Date, and Status. On the right, the 'Field Properties' panel shows: Field name: Student, Field link name: student, Display Fields: SIMATS Library Book Reservation System -> Student Details, and Display type: Multi Select. The bottom status bar is consistent with the previous steps.

STEP 8: Create Book Search Form.

The screenshot shows the 'Book Search' form creation interface. On the left, under 'Basic Fields', there are icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. In the center, the form fields are being built: 'Book Title' (selected), 'Author', 'Book Category', 'Publication', and 'Availability'. On the right, the 'Field Properties' panel shows settings for the 'Book Title' field: Field name is 'Book Title', Field link name is 'book_title', Validation is set to 'Mandatory' and 'No duplicate values', Initial value is empty, and Character maximum is 255.

STEP 9: Create Feedback form

The screenshot shows the 'Feedback' form creation interface. On the left, under 'Basic Fields', there are icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. In the center, the form fields are being built: 'Student' (selected), 'Book', 'Rating', and 'Comments'. On the right, the 'Field Properties' panel shows settings for the 'Student' field: Field name is 'Student', Field link name is 'student', and Display type is 'Multi Select'. Below the field properties, there is a section for 'Display Fields' showing a link to 'SIMATS Library Book Reservation System → Student Details' and a dropdown menu for 'Student ID'.

STEP 10: Add sample data to all the created forms.

The screenshot shows the 'Student Details' form with sample data added. The form fields and their values are: Student Name (Kanmani), Registration Number (192511414), Department (Computer Science), Year Of Study (II Year), Mobile Number (+91 8765432199), Email (kanmanilogu04@gmail.com), and Status (Active). The interface includes a sidebar with navigation options: Dashboard, Book Reservation, Book Issue Return, Feedback, Student Details, Student Details Re..., Board, and Book Details. The top bar shows the trial expires in 14 days and provides links for Upgrade, Edit this application, and Help.

STEP 11: Create reports to display the data entered in the respective forms.

STEP 12: Create and display the Dashboard with important library information and book reservation details.

EXPERIMENT 5:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR MARK SHEET PROCESSING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Mark Sheet Processing System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into **zoho.com**.

STEP 2: Create a new application from scratch in Zoho Creator.

A screenshot of the "Create from scratch" form in Zoho Creator. The form has a light gray background. At the top, there is a logo consisting of four colored circles (blue, orange, green, and red) arranged in a square. Below the logo, the text "Create from scratch" is centered. The form contains a text input field for "Application Name" with a red asterisk indicating it is required. The text "SIMATS Marksheet Processing System" is entered in the field. Below the input field, there is a checkbox labeled "Enable Environment" followed by a link "Learn More". At the bottom of the form is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Students Form.

STEP 5: Create Subject Form.

The screenshot shows the 'Subjects' form creation interface. On the left, a 'Basic Fields' panel contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main form area contains fields for Subject ID, Subject Code, Subject Name, Semester, Credits, and Faculty Name. On the right, the 'Field Properties' panel shows the configuration for the 'Subject ID' field: Field name is 'Subject ID', Field link name is 'subject_id', Validation Start index is '1', and Field type is 'Auto Number'. The top navigation bar includes a 'Done' button and a trial expiration notice.

STEP 6: Create Marks Form.

The screenshot shows the 'Marks' form creation interface. The 'Basic Fields' panel is the same as in Step 5. The main form area contains fields for Student, Subject, Internal Marks, External Marks, Total Marks, and Grade. The 'Field Properties' panel on the right shows the configuration for the 'Student' field: Field name is 'Student', Field link name is 'student', and Display Fields include 'SIMATS Mark Sheet Processing System' and 'Students'. The top navigation bar includes a 'Done' button and a trial expiration notice.

STEP 7: Create Mark Sheet Form.

The screenshot shows the 'Mark Sheets' form creation interface. The 'Basic Fields' panel is the same as in Step 5. The main form area contains fields for Student, Semester, Total Marks, Average, Percentage, Overall Grade, and Overall Performance. The 'Field Properties' panel on the right shows the configuration for the 'Student' field: Field name is 'Student', Field link name is 'student', and Display Fields include 'SIMATS Mark Sheet Processing System' and 'Students'. The top navigation bar includes a 'Done' button and a trial expiration notice.

STEP 8: Create Feedback Form.

The screenshot shows the 'SIMATS Mark Sheet Processing System' interface for creating a 'Feedbacks' form. The top bar includes a 'Done' button. The left sidebar shows 'Basic Fields' with icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main area displays the form fields: 'Student' (with a search icon), 'Rating', and 'Comments'. The right sidebar shows 'Field Properties' for the 'Student' field, including 'Field name', 'Field link name', 'View Field References', 'Display Fields', and 'Display type'. The bottom status bar indicates 'Trial expires in 14 days' and includes links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 9: Create Rank List Form.

The screenshot shows the 'SIMATS Mark Sheet Processing System' interface for creating a 'Rank Lists' form. The top bar includes a 'Done' button. The left sidebar shows 'Basic Fields' with icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main area displays the form fields: 'Student' (with a search icon), 'Percentage', 'Rank', and 'Academic Year'. The right sidebar shows 'Field Properties' for the 'Student' field, including 'Field name', 'Field link name', 'View Field References', 'Display Fields', and 'Display type'. The bottom status bar indicates 'Trial expires in 14 days' and includes links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 10: Add sample data to all the created forms

The screenshot shows the 'SIMATS Mark Sheet Processing System' interface for adding sample data to the 'Subjects' form. The left sidebar shows the 'Subjects' menu item highlighted. The main area displays the 'Subjects' form with fields for 'Subject Code', 'Subject Name', 'Semester', 'Credits', and 'Faculty Name'. The 'Subject Code' field contains 'CSA15', 'Subject Name' contains 'cloud computing', 'Semester' contains '2', 'Credits' contains '6', and 'Faculty Name' contains 'Dr.Rajaram'. The bottom status bar includes 'Submit' and 'Reset' buttons.

STEP 11: Create reports to display the data entered in the respective forms.
